Jackie –
This is what I got from the State on nitrogen to address Trinkaus' comments.

Thanks
Doug

Subject: Nitrogen Discharge Evaluations from Subsurface Sewage Disposal Systems

Good Morning Doug,
I am responding to your recent inquiry regarding our Department's position on nitrogen discharge evaluations for properties served by an on-site subsurface sewage disposal system with design flows less than 7500 gallons per day.

Our Department currently has no requirements for evaluating nitrogen discharges from on-site subsurface sewage disposal systems. Our Department recommends that if a certain town or jurisdiction wishes to implement such a requirement that they do so through the adoption of a local ordinance rather than randomly to individual properties.

If you have any additional questions, please feel free to contact me.

Thanks.

Matthew A. Pawlik, P.E., R.S.
