Press Release

Hanson Road Bridge Over Stony Brook River

During routine maintenance checks, the Town of Darien found deficiencies in the condition of the Hanson Road Bridge over the Stony Brook River located on Hanson Road between the intersections of Hummingbird Lane and Linda Lane. The aerial photo below shows the location of the bridge. The bridge is safe to travel over and is being monitored on a regular basis.

The Town is in the process of determining the scope of repair. As recommended by our consultant, the Town has placed barricades along the north side of the bridge to prevent vehicular traffic from passing over the area where the deficiency is noted. This has reduced the width of the bridge as well as to the approaches from both sides.

Please use caution in this area and consider alternative routes when planning your travels. The Town will notify the public on future developments regarding this project.
